

Title 33
ENVIRONMENTAL QUALITY

Part III. Air

Chapter 5. Permit Procedures

§506. Clean Air Interstate Rule Requirements

A. ~~Reserved.~~ Clean Air Interstate Rule (CAIR) Nitrogen Oxide (NO_x) Annual Program. This Subsection is adopted in lieu of 40 CFR 97.141 and 97.142 as promulgated under the CAIR Federal Implementation Plan (FIP) NO_x Annual Trading Program on April 28, 2006, at 71 FR 25328. All provisions of 40 CFR Part 97, Subparts AA – HH, continue to apply, with the exception of §97.141 (Timing Requirements for CAIR NO_x Allowance Allocations) and §97.142 (CAIR NO_x Allowance Allocations). The provisions of this Subsection state how the CAIR NO_x annual allowances shall be allocated in accordance with this Section and 40 CFR 97.144(a).

1. Definitions. The terms used in Subsection A of this Section have the meaning given to them in the CAIR FIP (40 CFR Part 97 as promulgated on April 28, 2006), except for those terms defined herein:

Certified Unit or Contract—an electricity-generating unit or contract that has been certified by the LPSC or approved by a municipal authority but was not in operation on, or approved by, December 31, 2004.

Department—the Louisiana Department of Environmental Quality.

LPSC—the Louisiana Public Service Commission.

LPSC or Municipal Certification—the process under which the LPSC certifies, or the relevant municipal authority approves, an electricity-generating facility and/or all of its component units, additions, and up-rated or re-powered units as being in the public convenience and necessity. This process includes the certification or approval of long-term contracts that dedicate a portion of the electrical output of any generation facility to a utility unit. Long-term contracts are those contracts of at least one year in duration, provided that the municipality or utility unit expects to receive power under the contract within one year of the contract execution.

Municipal Authority—a municipal corporation, public power authority, or other political subdivision including, but not limited to, the Louisiana Energy and Power Authority.

Non-Utility Unit—an electricity-generating unit that has not been certified by the LPSC or approved by a municipal authority, and that does not have an effective and active long-term contract with a utility unit. This includes, but is not limited to, units owned by independent power producers (IPPs) that are the owners or operators of electricity-generating units that produce electricity for sale, and ~~cogenerators~~ *cogeneration units* as defined in 40 CFR Part 97.

Utility Unit—a certified unit that is in operation, a previously-operational certified unit, or a non-utility unit that has an effective and active long-term contract with a utility unit. Long-term contracts are those contracts of at least one year in duration, provided that the municipality or utility unit expects to receive power under the contract within one year of the contract execution.

2. Allocation of CAIR NO_x Annual Allowances. Total NO_x allowances allocated per control period shall not be in excess of the CAIR NO_x annual budget as found in 40

CFR 97.140 (35,512 tons per control period from 2009-2014 and 29,593 tons per control period thereafter).

a. Non-Utility Units. For each CAIR non-utility unit, the NO_x allowances shall be equal to the average of the actual NO_x annual emissions of the three calendar years immediately preceding the year in which the control period allocations are submitted to the administrator. The actual NO_x annual emissions as reported in the emission inventory required by LAC 33:III.919 shall be used, except that the allowances submitted in 2007 shall use the actual NO_x emissions for calendar years 2002, 2003, and 2004. When data is not available in the emission inventory, data reported to the Federal Acid Rain Program shall be used. When actual reported NO_x annual emissions data are available for only two of the three calendar years immediately preceding the deadline for submission of the control period allocations, the average of the actual reported NO_x annual emissions data for those two years shall be used. When actual reported NO_x annual emissions data are available for only one of the three calendar years, the actual reported NO_x annual emissions data for that one year shall be used. When no actual reported NO_x annual emissions data for any of the three calendar years are available, no allocations shall be made under this Paragraph.

b. Certified Units. A certified unit subject to CAIR shall be allocated NO_x allowances for the control period in which the unit will begin operation, and for each successive control period, for which no NO_x allowances have been previously allocated until operating data are available for the three calendar years immediately preceding the deadline for submission of the control period allocations. Until a unit has three calendar years of operating data immediately preceding the allocation submittal deadline, the converted heat input as calculated in Clause A.2.b.i or ii of this Section shall be used to allocate allowances for the unit. The certified unit shall be treated as a utility unit for the purposes of this allocation, except that converted heat input shall be used instead of adjusted heat input. Converted heat input is calculated as follows.

i. For a coal-fired unit, the hourly heat input for a specified calendar year shall equal the control period gross electrical output, including the capacity factor, of the generator(s) served by the unit multiplied by 7,900 BTU/KWh and divided by 1,000,000 BTU/MMBTU. The control period gross electrical output as stated in the documentation presented for the LPSC or municipal certification shall be used in this calculation. If a generator is served by two or more units, then the gross electrical output of the generator shall be attributed to each unit in proportion to the unit's share of the total control period heat input of all the units for the year.

ii. For a non-coal-fired unit, the hourly heat input for a specified calendar year shall equal the control period gross electrical output, including the capacity factor, of the generator(s) served by the unit multiplied by 6,675 BTU/KWh and divided by 1,000,000 BTU/MMBTU. The control period gross electrical output as stated in the documentation presented for the LPSC or municipal certification shall be used in this calculation. If a generator is served by two or more units, then the gross electrical output of the generator shall be attributed to each unit in proportion to the unit's share of the total control period heat input of all the units for the year.

c. Utility Units. The department shall allocate CAIR NO_x allowances to each CAIR utility unit by multiplying the CAIR NO_x budget for Louisiana (40 CFR 97.140), minus the allowances allocated under Subparagraph A.2.a of this Section, by the ratio of the adjusted baseline heat input of the CAIR utility unit and/or converted heat input of a certified

unit to the total amount of adjusted baseline heat input and converted heat input of all CAIR utility units and certified units in the state and rounding to the nearest whole allowance. The adjusted baseline heat input (in MMBTU) used with respect to the CAIR NO_x annual allowance for each CAIR utility unit shall be established as follows.

i. The average of the unit's control period adjusted heat input for the three calendar years immediately preceding the deadline for submission of allocations to the administrator shall be used (except that the allocation submitted in 2007 shall use the average of the control period adjusted heat input for calendar years 2002, 2003, and 2004), with the control period adjusted heat input for each year calculated as follows.

(a). If the unit is coal-fired during a year, the unit's control period heat input for that year shall be multiplied by 100 percent.

(b). If the unit is oil-fired during a year, the unit's control period heat input for that year shall be multiplied by 60 percent.

(c). If the unit is not subject to Subclause A.2.c.i.(a) or (b) of this Section, the unit's control period heat input for the year shall be multiplied by 40 percent.

ii. A unit's control period heat input, status as coal-fired or oil-fired, and total tons of NO_x emissions during a calendar year shall be determined in accordance with 40 CFR Part 97 and reported in accordance with LAC 33:III.919.

3. Timing Requirements for CAIR NO_x Annual Allowance Allocations

a. By April 30, 2007, the department shall submit to the administrator the CAIR NO_x annual allowance allocations, in a format prescribed by the administrator and in accordance with Paragraph A.2 of this Section, for the control periods in 2009, 2010, and 2011.

b. By October 31, 2008, for the year 2012, and by October 31 of each year thereafter, the department shall submit to the administrator CAIR NO_x annual allowance allocations, in a format prescribed by the administrator and in accordance with Paragraph A.2 of this Section, for the control period in the fourth year after the year of the applicable deadline for submission under this Section.

B. ~~Reserved.~~ Clean Air Interstate Rule (CAIR) Nitrogen Oxide (NO_x) Ozone Season Program. This Subsection is adopted in lieu of 40 CFR 97.341 and 97.342 as promulgated under the CAIR Federal Implementation Plan (FIP) NO_x Ozone Season Trading Program on April 28, 2006, at 71 FR 25328. All provisions of 40 CFR Part 97, Subparts AAAA – HHHH, continue to apply, with the exception of §97.341 (Timing Requirements for CAIR NO_x Ozone Season Allowance Allocations) and §97.342 (CAIR NO_x Ozone Season Allowance Allocations). The provisions of this Subsection state how the CAIR NO_x ozone season allowances shall be allocated in accordance with this Section and 40 CFR 97.343(a).

1. Definitions. The terms used in Subsection B of this Section have the meaning given to them in the CAIR FIP (40 CFR Part 97 as promulgated on April 28, 2006), and in Paragraph A.1 of this Section.

2. Allocation of CAIR NO_x Ozone Season Allowances. Total NO_x ozone season allowances allocated per control period shall not be in excess of the CAIR NO_x ozone season budget as found in 40 CFR 97.340 (17,085 tons per control period from 2009-2014 and 14,238 tons per control period thereafter).

a. Non-Utility Units. For each CAIR non-utility unit, the NO_x allowances shall be equal to the average of the actual NO_x ozone season emissions of the three calendar years immediately preceding the year in which the control period allocations are

submitted to the administrator. The actual NO_x ozone season emissions as reported in the emission inventory required by LAC 33:III.919 shall be used, except that the allowances submitted in 2007 shall use the actual NO_x emissions for calendar years 2002, 2003, and 2004 that were reported to the Federal Acid Rain Program. When data is not available in the emission inventory, data reported to the Federal Acid Rain Program shall be used. When actual reported NO_x ozone season emissions data are available for only two of the three calendar years immediately preceding the deadline for submission of the control period allocations, the average of the actual reported NO_x ozone season emissions data for those two years shall be used. When actual reported NO_x ozone season emissions data are available for only one of the three calendar years, the actual reported NO_x ozone season emissions data for that one year shall be used. When no actual reported NO_x ozone season emissions data for any of the three calendar years are available, no allocations shall be made under this Paragraph.

b. Certified Units. A certified unit subject to CAIR shall be allocated NO_x allowances for the ozone season of the control period in which the unit will begin operation, and for each successive ozone season in a control period, for which no NO_x allowances have been previously allocated until ozone season operating data are available for the three calendar years immediately preceding the deadline for submission of the control period allocations. Until a unit has three years of ozone season operating data preceding the allocation submittal deadline, the converted heat input as calculated in Clause B.2.b.i or ii of this Section shall be used to allocate ozone season allowances for the unit. The certified unit shall be treated as a utility unit for purposes of this allocation, except that ozone season converted heat input shall be used instead of ozone season adjusted heat input. Ozone season converted heat input is calculated as follows.

i. For a coal-fired unit, the hourly heat input for a specified calendar year shall equal the control period gross electrical output, including the capacity factor, of the generator(s) served by the unit multiplied by 7,900 BTU/KWh and divided by 1,000,000 BTU/MMBTU and multiplied by 5/12. The control period gross electrical output as stated in the documentation presented for the LPSC or municipal certification shall be used in this calculation. If a generator is served by two or more units, then the gross electrical output of the generator shall be attributed to each unit in proportion to the unit's share of the total control period heat input of all the units for the years specified ozone season.

ii. For a non-coal-fired unit, the hourly heat input for a specified calendar year shall equal the control period gross electrical output, including the capacity factor, of the generator(s) served by the unit multiplied by 6,675 BTU/KWh and divided by 1,000,000 BTU/MMBTU and multiplied by 5/12. The control period gross electrical output as stated in the documentation presented for the LPSC or municipal certification shall be used in this calculation. If a generator is served by two or more units, then the gross electrical output of the generator shall be attributed to each unit in proportion to the unit's share of the total control period heat input of all the units for the years specified ozone season.

c. Utility Units. The department shall allocate CAIR NO_x ozone season allowances to each CAIR utility unit by multiplying the CAIR NO_x ozone season budget for Louisiana (40 CFR 97.340), minus the allowances allocated under Subparagraph B.2.a of this Section, by the ratio of the ozone season adjusted baseline heat input of the CAIR utility unit and/or converted heat input of a certified unit to the total amount of ozone season adjusted baseline heat input and converted heat input of all CAIR utility units and certified units in the state and rounding to the nearest whole allowance. The ozone season adjusted baseline heat

input (in MMBTU) used with respect to the CAIR NO_x ozone season allowance for each CAIR utility unit shall be established as follows.

i. The average of the unit's control period ozone season adjusted heat input for the three calendar years immediately preceding the deadline for submission of allocations to the administrator shall be used (except that the allocation submitted in 2007 shall use the average of the control period ozone season adjusted heat input for calendar years 2002, 2003, and 2004), with the control period ozone season adjusted heat input for each year calculated as follows.

(a). If the unit is coal-fired during a year, the unit's control period ozone season heat input for that year shall be multiplied by 100 percent.

(b). If the unit is oil-fired during a year, the unit's control period ozone season heat input for that year shall be multiplied by 60 percent.

(c). If the unit is not subject to Subclause B.2.c.i.(a) or (b) of this Section, the unit's control period ozone season heat input for the year shall be multiplied by 40 percent.

ii. A unit's control period ozone season heat input, status as coal-fired or oil-fired, and total tons of NO_x ozone season emissions during a calendar year shall be determined in accordance with 40 CFR Part 97 and reported in accordance with LAC 33:III.919.

3. Timing Requirements for CAIR NO_x Ozone Season Allowance Allocations

a. By April 30, 2007, the department shall submit to the administrator the CAIR NO_x ozone season allowance allocations, in a format prescribed by the administrator and in accordance with Paragraph B.2 of this Section, for the control periods in 2009, 2010, and 2011.

b. By October 31, 2008, for the year 2012, and by October 31 of each year thereafter, the department shall submit to the administrator the CAIR NO_x ozone season allowance allocations, in a format prescribed by the administrator and in accordance with Paragraph B.2 of this Section, for the control period in the fourth year after the year of the applicable deadline for submission under this Section.
